FOR SALE

6890 NIEDERWALD STRASSE

Niederwald, TX 78640

KYLE–NIEDERWALD GROWTH CORRIDOR

Development opportunity for a flexible commercial / light-industrial campus.

11± ACRES

EXCEPTIONAL FM 2001 FRONTAGE

FM 2001 FRONTAGE | 11± ACRES | 2 PARCELS

Parcel IDs: R152111 • R185172

PROPERTY AERIAL | OUTLINED SITE

A frontage-led development opportunity.

A rare 11± acre configuration with approximately 1,200 feet of FM 2001 frontage.

11±	≈1,200 FT	2	FM 2001	NIEDERWALD
ACRES	FM 2001 FRONTAGE	PARCEL IDS	PRIMARY CORRIDOR	HAYS COUNTY

THE DEVELOPMENT THESIS

- Use the substantial FM 2001 frontage to create visibility, identity and potential commercial pads.
- Develop flex / small-bay space behind the frontage for contractors, service businesses and warehouse users.
- Phase construction so the campus can respond to demonstrated demand rather than requiring a single large buildout.
- Position the site to serve a growing residential, commercial and employment corridor.

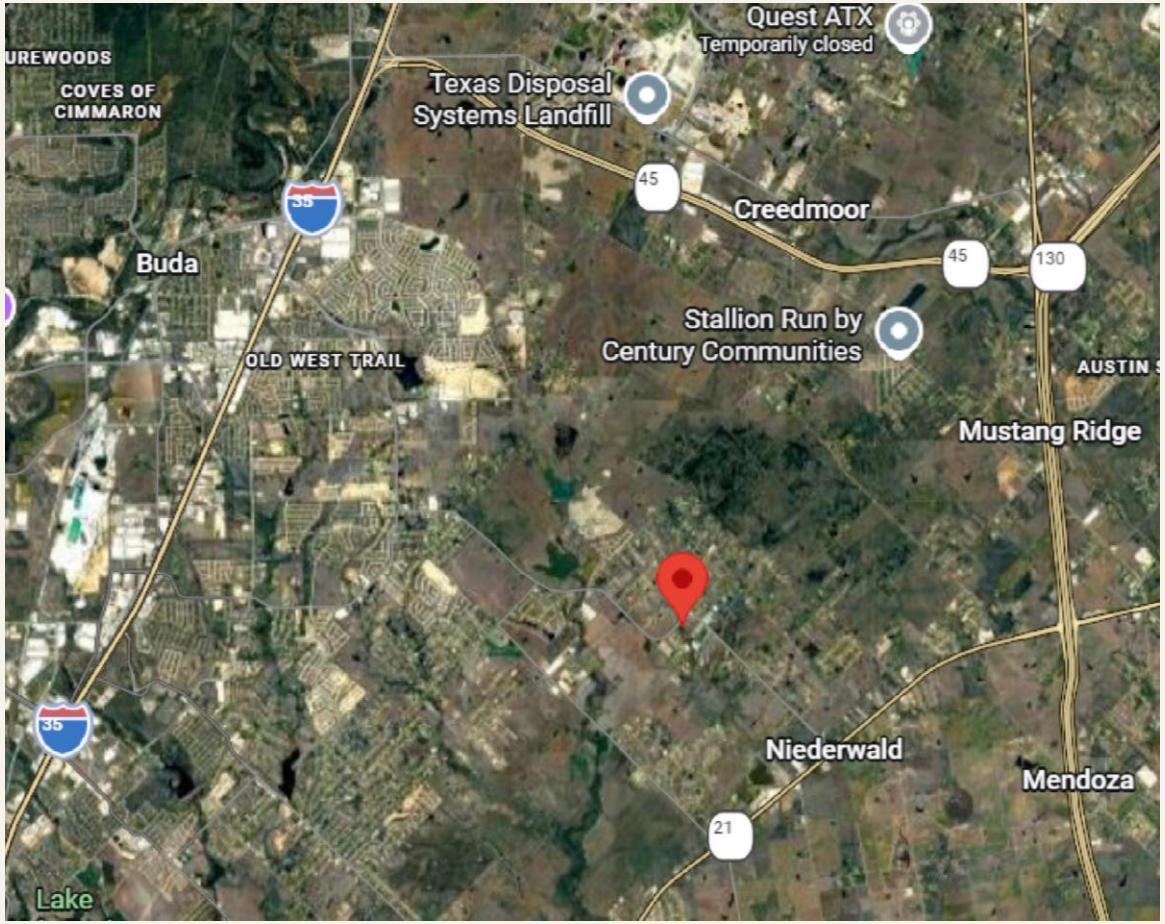

ACTUAL PROPERTY AERIAL

Positioned within the Kyle–Niederwald growth corridor.

FM 2001 connects the I-35 growth corridor with SH 21 and provides onward access toward SH 130.

REGIONAL CONNECTIVITY | SCHEMATIC

Routes are schematic and not to scale.

LOCATION LOGIC

- East-west FM 2001 corridor exposure
- Regional connection to I-35
- Access toward SH 21
- Onward connectivity toward SH 130
- Positioned in a rapidly transitioning growth area

≈1,200 feet of frontage is the site's defining asset.

That frontage creates options for multiple identities, pads, entrances and phases.

FM 2001 **≈1,200 FEET OF ROAD FRONTAGE**

VISIBILITY • ACCESS • SIGNAGE POTENTIAL

ACTUAL AERIAL • BLUE PROPERTY BOUNDARY SHOWN

ILLUSTRATIVE / NOT TO SCALE

WHAT THE FRONTAGE CAN SUPPORT

- Frontage-oriented commercial or service pads
- Separate building identities for multiple users
- Showroom / warehouse uses near the road
- Flex and warehouse space positioned behind
- Phased development without committing the entire site at once

A campus strategy that uses the site in layers.

Frontage creates visibility. The interior creates depth, operational space and flexibility.

ACTUAL PROPERTY AERIAL • EXISTING CONDITIONS

WHY FLEX?

- Scalable building format
- Multiple potential users
- Frontage + operational depth
- Potential phased delivery
- Suitable for owner-users or multi-tenant strategy

Broad commercial and light-industrial flexibility.

Potential uses should be refined through zoning, access, utility and market due diligence.

01 Flex Industrial
Multi-tenant or owner-user flex space.

02 Small-Bay Warehouse
Right-sized suites for local operators.

03 Office / Warehouse
Office, storage and operating space.

04 Contractor Business Park
Trades, construction and service operators.

05 Showroom / Warehouse
Customer-facing sales with back-of-house storage.

06 Trade & Building Supply
Materials, products and contractor support.

07 Service Commercial
Local businesses needing visibility and operations space.

08 Light Industrial
Lower-intensity production, assembly or distribution.

09 Business Park
Multiple buildings with complementary users.

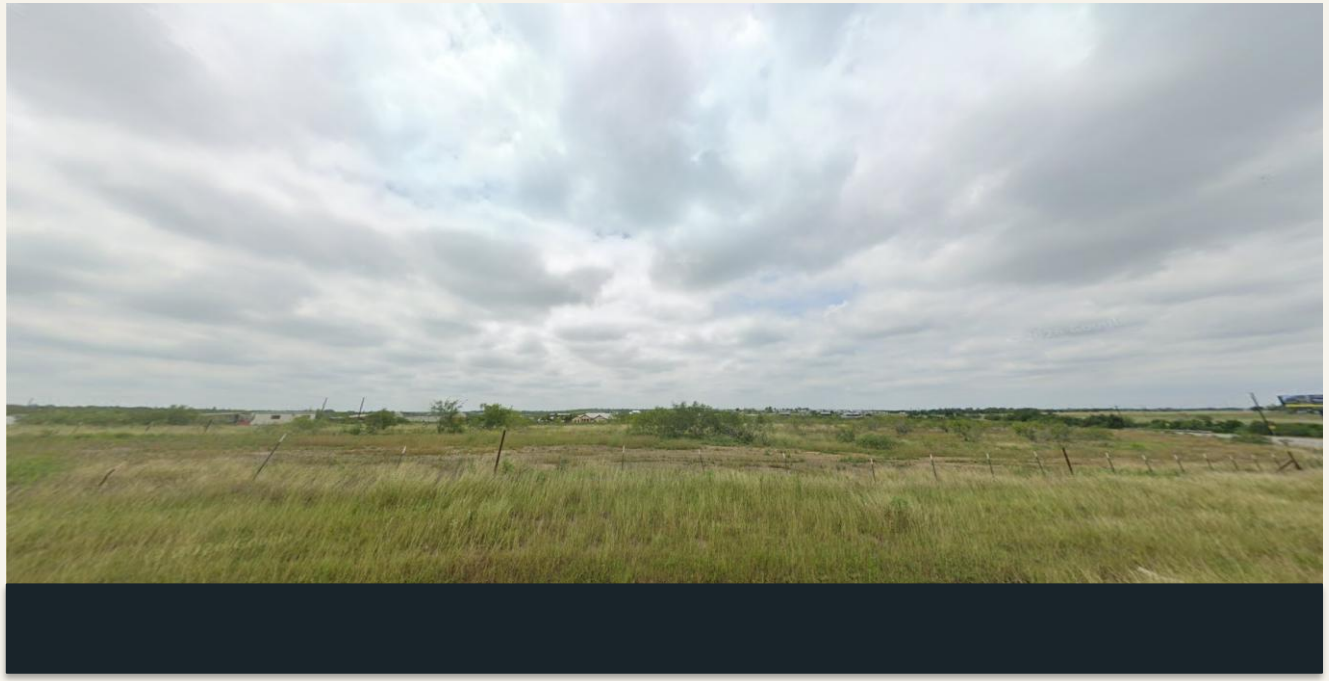

10 Owner-User Development
Custom facility or headquarters campus.

11 Commercial Pad Sites
Individual frontage-oriented opportunities.

12 Phased Development
Staged investment aligned with market demand.

Small-bay flex can create a diversified campus.

A repeatable building format can serve several business categories without relying on one large user.

Conceptual only • final building count, sizes and circulation require engineering.

ILLUSTRATIVE PROGRAM

Frontage Pads

Commercial / service uses with strong road visibility.

Flex Buildings

Small-bay office / warehouse or flex suites.

Shared Circulation

Internal drive, loading and customer access.

Future Phases

Additional buildings or pads as demand develops.

A practical location for businesses that support growth.

The development concept is particularly compatible with trade, construction and service operators.

CONSTRUCTION

General contractors, specialty trades and subcontractors.

HVAC / ELECTRICAL

Service operations, parts inventory and dispatch.

PLUMBING

Operations, storage and contractor support.

LANDSCAPING

Equipment, materials and field-service operations.

EQUIPMENT

Light equipment, rental and support businesses.

BUILDING SUPPLY

Trade-oriented showroom, sales and storage.

The opportunity is a user ecosystem, not a single-use bet.

Deploy capital in stages as the corridor matures.

A phased approach can reduce early overbuilding and preserve future optionality.

PHASE 1

ACTIVATE

Establish frontage presence with the highest-visibility commercial / flex components.

PHASE 2

EXPAND

Add small-bay flex or office / warehouse buildings as demand is demonstrated.

PHASE 3

COMPLETE

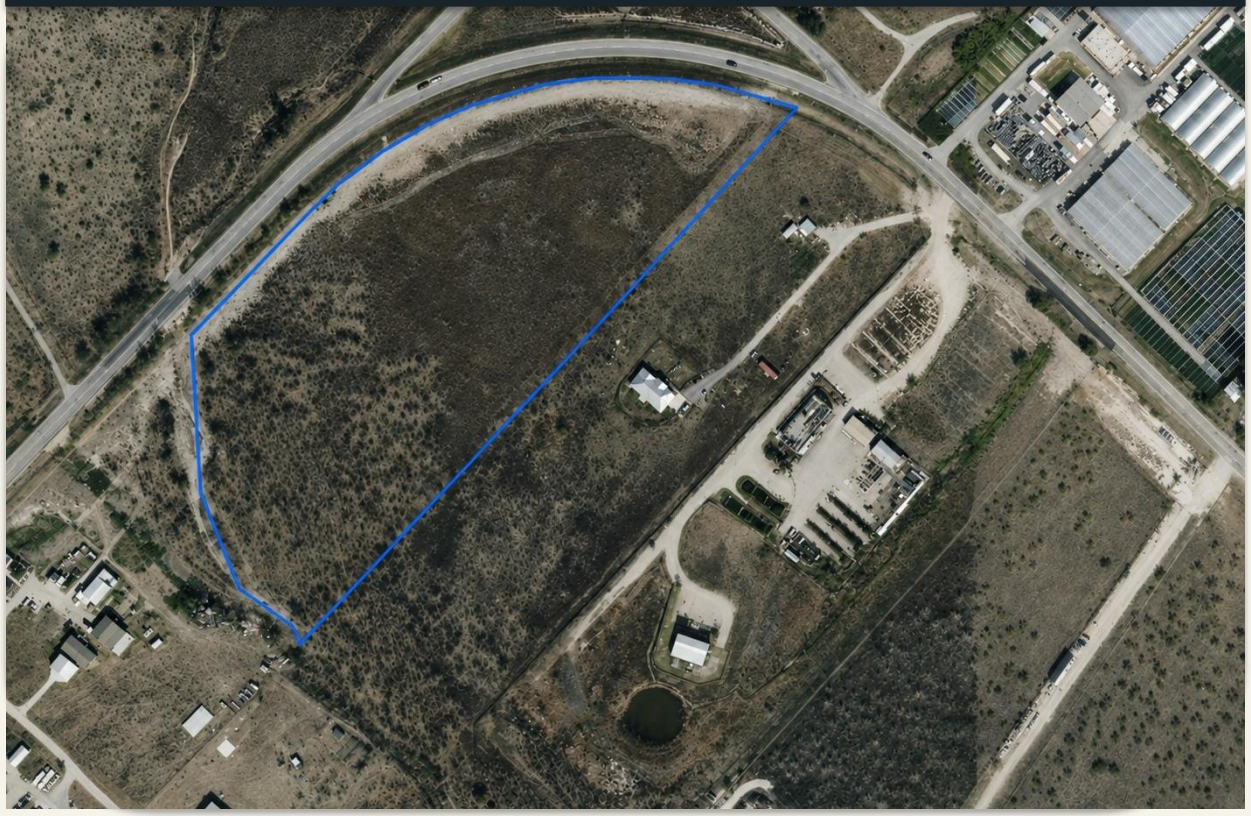

Add complementary users, pads or future phases based on market performance.

PLANNING PRINCIPLE **Frontage first. Repeatable flex second. Expansion when demand supports it.**

Evaluate the property as a platform, not a single building.

The right plan should balance frontage value, circulation, parking, utilities and future phases.

PROPERTY AERIAL • DEVELOPMENT CONTEXT

KEY PLANNING QUESTIONS

- How much frontage should be allocated to pads?
- What building depth best supports flex users?
- Where should loading and service circulation sit?
- How can future phases remain accessible?
- What utility capacity is available or expandable?

Next step: preliminary civil/site planning and entitlement validation.

- Which use mix creates the strongest risk-adjusted value?

Serve the people and businesses arriving with growth.

The property's potential is tied to both population expansion and the commercial services that follow it.

01

RESIDENTIAL GROWTH

New housing increases demand for local services, trades, contractors and convenience-oriented businesses.

02

COMMERCIAL DEMAND

Growing corridors create opportunities for visible service, showroom and flex users.

03

EMPLOYMENT & TRADES

Construction, maintenance, supply and operating businesses need functional local space.

A flexible land strategy with multiple potential exits.

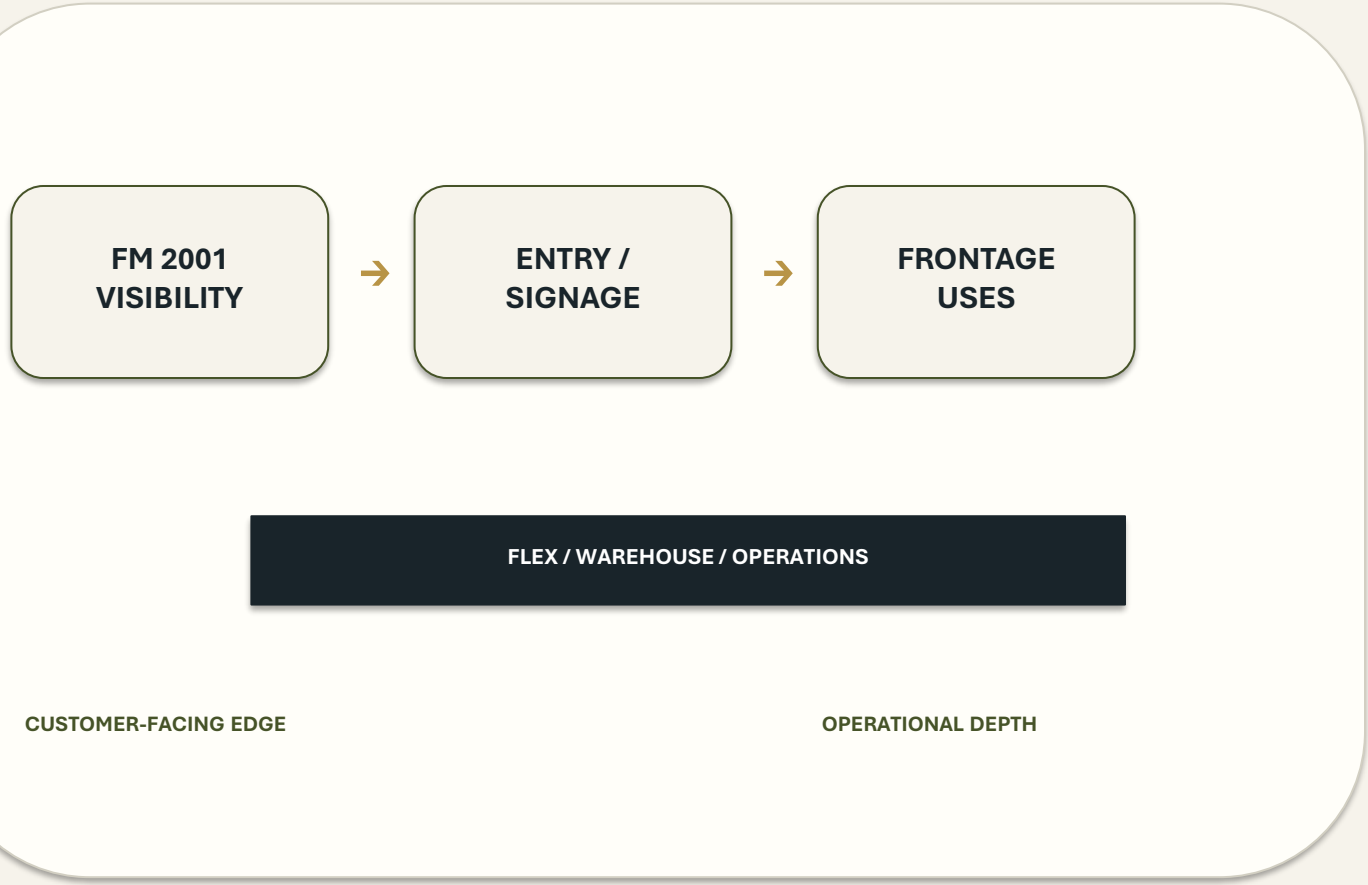

The strongest value proposition is optionality across development, leasing and disposition.

01	**Acquire**	Control an 11± acre tract with exceptional FM 2001 frontage.
02	**Validate**	Confirm access, utilities, entitlements, drainage and market feasibility.
03	**Plan**	Create a frontage-led concept with repeatable flex / service components.
04	**Phase**	Deploy capital in stages and preserve future expansion.
05	**Monetize**	Lease, sell, owner-occupy or combine strategies as the project matures.

Core idea: maximize frontage value while preserving interior flexibility for future phases.

Turn visibility into a functional customer and operator experience.

A strong plan should make the site easy to find, easy to enter and easy to operate.

DESIGN PRIORITIES

- Clear entry and wayfinding
- Efficient circulation and loading
- Strong tenant visibility
- Separation of customer and service traffic
- Room for future expansion

The development thesis must be validated on the ground.

Before acquisition or construction, test the following site and market assumptions.

01 ZONING / ENTITLEMENTS

Permitted uses, setbacks, parking and development standards.

02 FM 2001 ACCESS

Driveway location, spacing, sight distance and roadway requirements.

03 UTILITIES

Water, wastewater, electric, telecom and available capacity.

04 CIVIL / DRAINAGE

Topography, stormwater, detention, drainage and earthwork.

05 ENVIRONMENTAL

Appropriate environmental and site-condition review.

06 SURVEY / TITLE

Boundaries, easements, encumbrances and access rights.

07 MARKET STUDY

Rents, sale pricing, absorption and competing supply.

08 CONCEPT PLAN

Preliminary civil plan with realistic building and parking assumptions.

A rare frontage-to-acreage configuration.

11± ACRES

≈1,200 FEET OF FM 2001 FRONTAGE

The property offers a flexible platform for commercial, flex industrial, service and light-industrial development concepts within the Kyle–Niederwald growth corridor.

PROPERTY SNAPSHOT

ACTUAL PROPERTY AERIAL

Concepts are illustrative and subject to governmental approvals, access approvals and utility capacity verification.

Information About Brokerage Services

Texas law requires all real estate license holders to give the following information about brokerage services to prospective buyers, tenants, sellers and landlords.

TYPES OF REAL ESTATE LICENSE HOLDERS:

- **A BROKER** is responsible for all brokerage activities, including acts performed by sales agents sponsored by the broker.
- **A SALES AGENT** must be sponsored by a broker and works with clients on behalf of the broker.

A BROKER'S MINIMUM DUTIES REQUIRED BY LAW (A client is the person or party that the broker represents):

- Put the interests of the client above all others, including the broker's own interests;
- Inform the client of any material information about the property or transaction received by the broker;
- Answer the client's questions and present any offer to or counter-offer from the client; and
- Treat all parties to a real estate transaction honestly and fairly.

A LICENSE HOLDER CAN REPRESENT A PARTY IN A REAL ESTATE TRANSACTION:

AS AGENT FOR OWNER (SELLER/LANDLORD): The broker becomes the property owner's agent through an agreement with the owner, usually in a written listing to sell or property management agreement. An owner's agent must perform the broker's minimum duties above and must inform the owner of any material information about the property or transaction known by the agent, including information disclosed to the agent or subagent by the buyer or buyer's agent.

AS AGENT FOR BUYER/TENANT: The broker becomes the buyer/tenant's agent by agreeing to represent the buyer, usually through a written representation agreement. A buyer's agent must perform the broker's minimum duties above and must inform the buyer of any material information about the property or transaction known by the agent, including information disclosed to the agent by the seller or seller's agent.

AS AGENT FOR BOTH - INTERMEDIARY: To act as an intermediary between the parties the broker must first obtain the written agreement of *each party* to the transaction. The written agreement must state who will pay the broker and, in conspicuous bold or underlined print, set forth the broker's obligations as an intermediary. A broker who acts as an intermediary:

- Must treat all parties to the transaction impartially and fairly;
- May, with the parties' written consent, appoint a different license holder associated with the broker to each party (owner and buyer) to communicate with, provide opinions and advice to, and carry out the instructions of each party to the transaction.
- Must not, unless specifically authorized in writing to do so by the party, disclose:
  - that the owner will accept a price less than the written asking price;
  - that the buyer/tenant will pay a price greater than the price submitted in a written offer; and
  - any confidential information or any other information that a party specifically instructs the broker in writing not to disclose, unless required to do so by law.

AS SUBAGENT: A license holder acts as a subagent when aiding a buyer in a transaction without an agreement to represent the buyer. A subagent can assist the buyer but does not represent the buyer and must place the interests of the owner first.

TO AVOID DISPUTES, ALL AGREEMENTS BETWEEN YOU AND A BROKER SHOULD BE IN WRITING AND CLEARLY ESTABLISH:

- The broker's duties and responsibilities to you, and your obligations under the representation agreement.
- Who will pay the broker for services provided to you, when payment will be made and how the payment will be calculated.

LICENSE HOLDER CONTACT INFORMATION: This notice is being provided for information purposes. It does not create an obligation for you to use the broker's services. Please acknowledge receipt of this notice below and retain a copy for your records.
