LAND-STAR

FOR SALE

±538 ACRES

PRIME DEVELOPMENT LAND

THORNDALE, TEXAS

1401 COUNTY RD 440
THORNDALE, TX 76577

Taylor–Thrall Growth Corridor

Large-scale land position with utility access,
wastewater planning and long-term development flexibility.

A large, strategically positioned Central Texas land asset

Two surveyed 269.007-acre tracts offered together as one ±538-acre assemblage.

A — ±538 ACRES

Contiguous assemblage in eastern Williamson County.

R — CR 440 FRONTAGE

Asphalt-paved county road frontage supports access and visibility.

W — WATER

Water line along CR 440.

E — ELECTRIC

Service available through Bartlett Electric Cooperative.

THE OPPORTUNITY

The property combines scale, paved access, nearby utility infrastructure and a wastewater permitting pathway in a corridor shaped by major employment and industrial investment.

Potential strategies include land banking, residential planning, master-planned communities and other compatible future development, subject to zoning, entitlements, engineering and buyer due diligence.

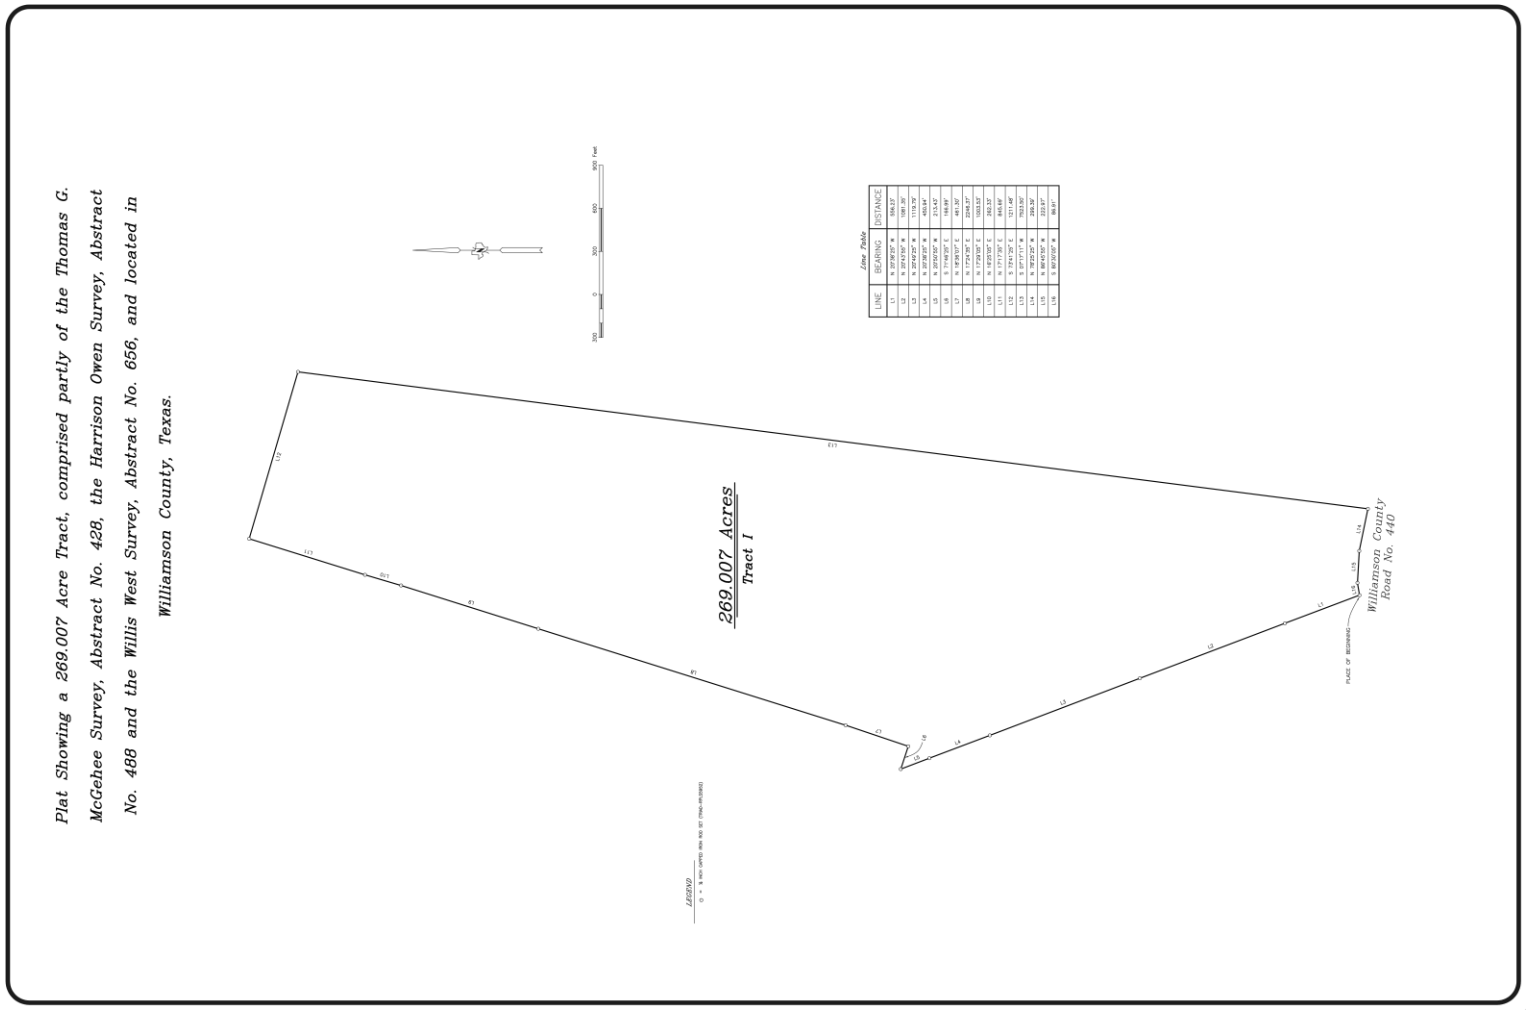

Property at a glance

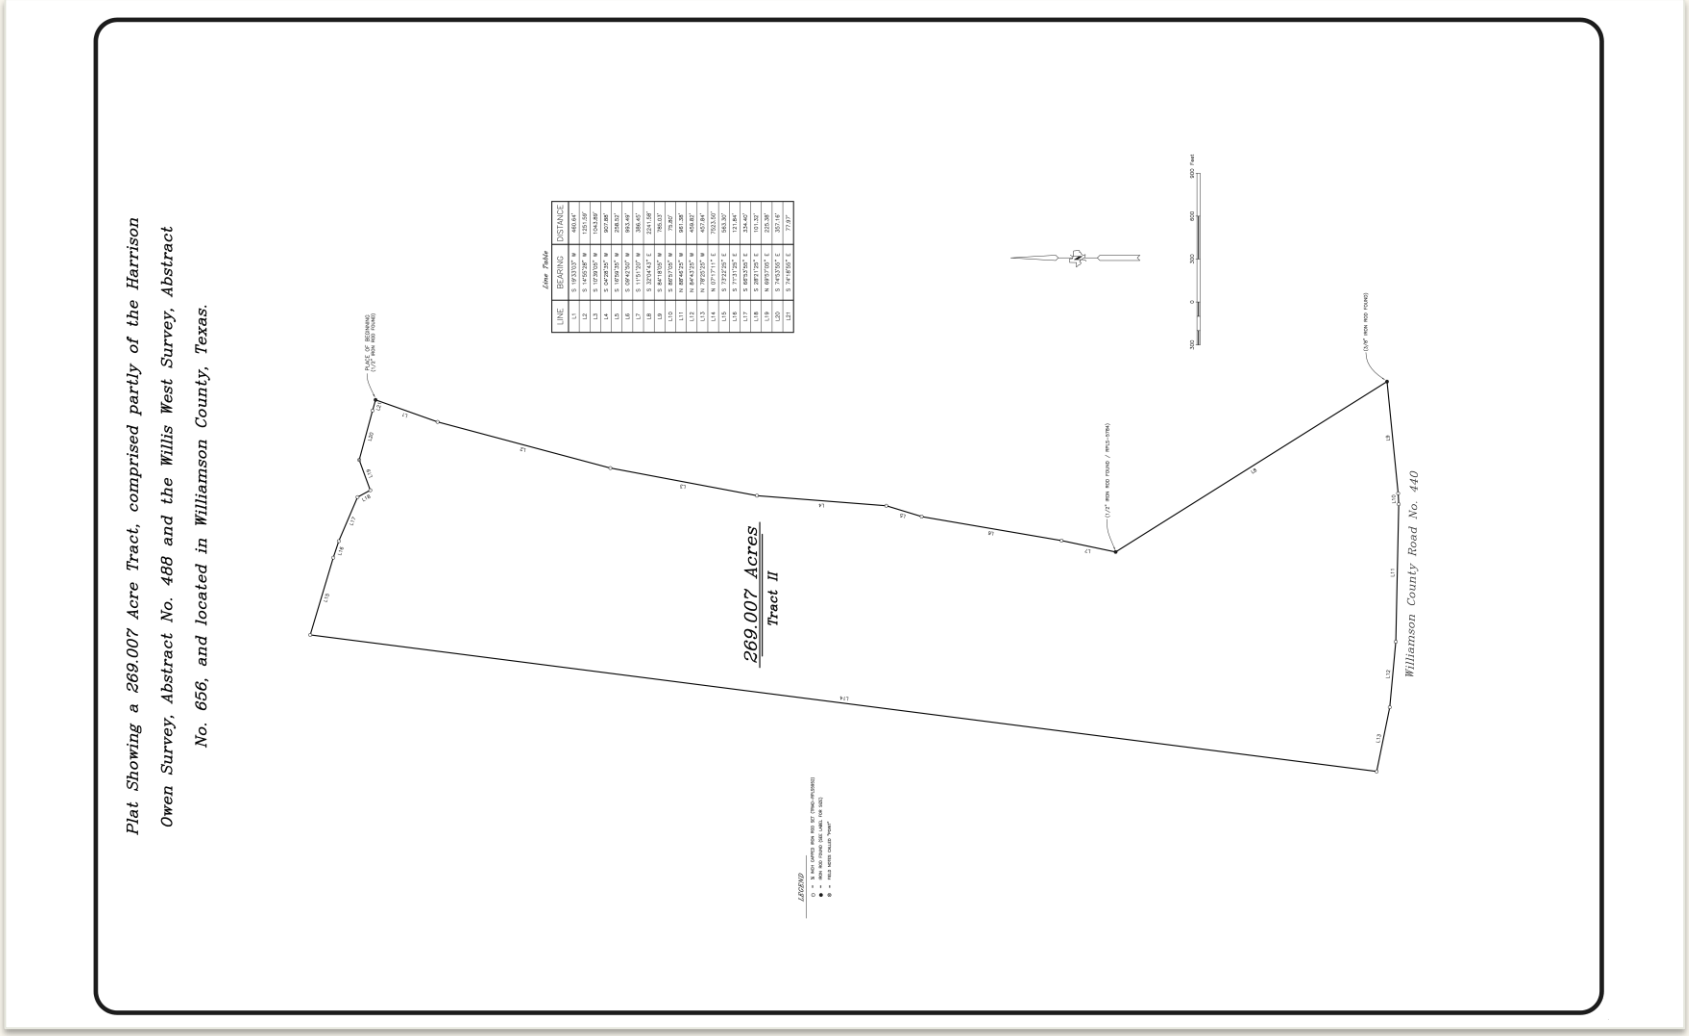

TOTAL ACREAGE	±538 acres
TRACT CONFIGURATION	Two surveyed 269.007-acre tracts
ADDRESS	1401 County Rd 440
CITY / ZIP	Thorndale, TX 76577
COUNTY	Williamson County
ACCESS	Paved CR 440 frontage

Property Concept Plan

Scale + infrastructure + location

A land position designed for long-term optionality.

1

SCALE

±538 contiguous acres provide meaningful planning flexibility and the ability to phase development over time.

2

INFRASTRUCTURE

Paved CR 440 frontage, a water line along CR 440 and electric service availability strengthen the site's infrastructure position.

3

GROWTH

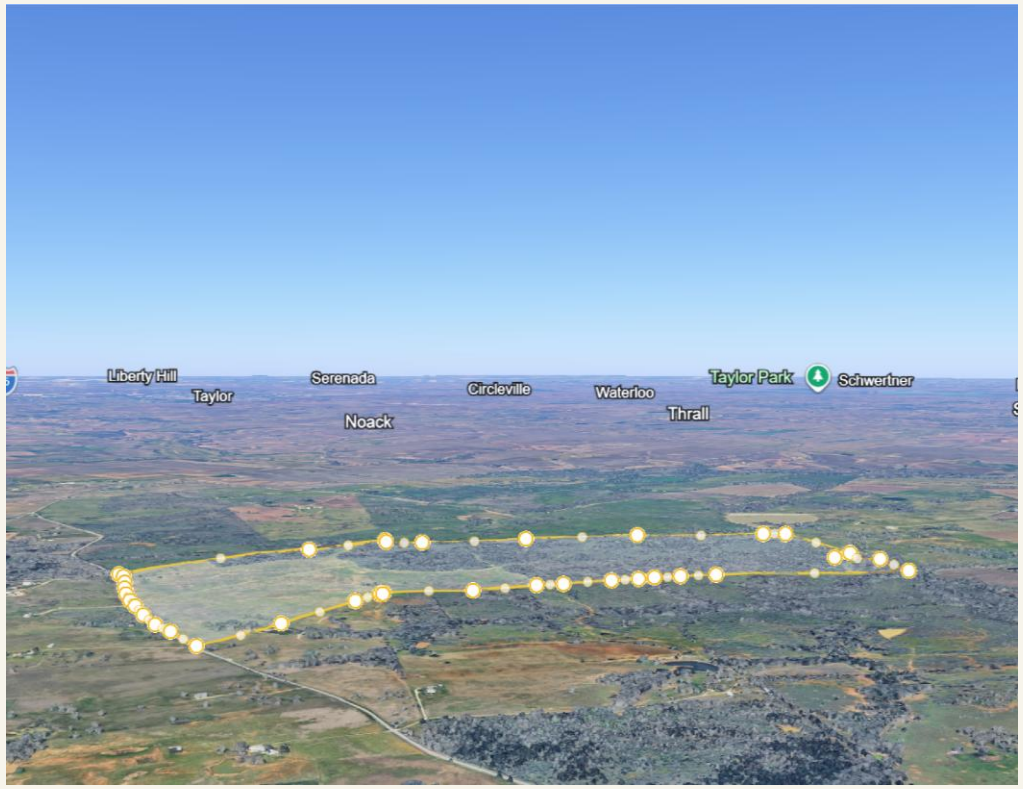

The site sits within an emerging employment and industrial corridor connecting Taylor, Thrall and Rockdale.

POSITIONING

A strategic land-bank opportunity with multiple future development paths.

All development concepts remain subject to market demand, title, survey, utilities, permitting, environmental review and applicable governmental approvals.

Access and utility position

PAVED CR 440 FRONTAGE

The property fronts asphalt-paved County Road 440, providing direct road access to the assemblage.

W

WATER LINE

Water line along CR 440.

E

ELECTRIC

Bartlett Electric Cooperative service available.

Infrastructure details should be independently confirmed with the applicable providers and through buyer due diligence.

A meaningful permitting milestone is underway

TCEQ wastewater discharge permit application filed; draft permit approval pending.

APPLICATION

TCEQ wastewater discharge permit application filed

CURRENT STATUS

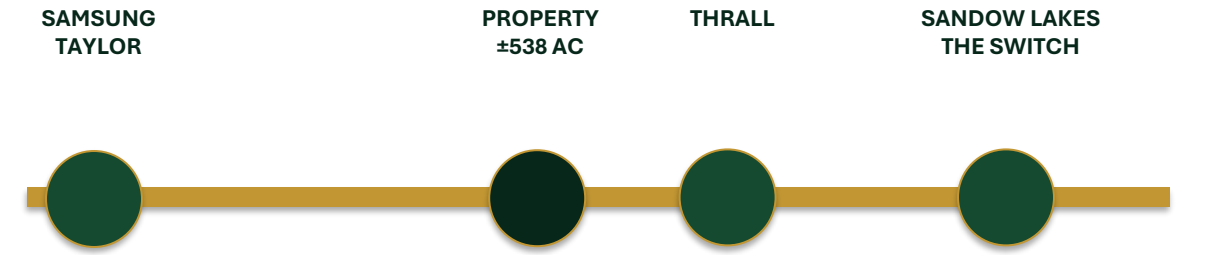

Awaiting draft permit approval

FUTURE PATH

Potential infrastructure pathway for future residential development

Important: Filing an application is not the same as having a final permit. Buyers should verify current TCEQ status, conditions and all applicable wastewater requirements before relying on this pathway.

At the intersection of major Central Texas growth drivers

WHY THIS CORRIDOR MATTERS

Samsung / Taylor

Major advanced-manufacturing investment anchors the western side of the corridor.

Sandow Lakes / The Switch

A major advanced-manufacturing and logistics campus is transforming the former Alcoa complex to the east.

Illustrative corridor diagram. Not to scale.

A corridor supported by major employment and industrial investment

LAND-STAR

W

SAMSUNG TAYLOR CAMPUS

Advanced manufacturing and high-tech employment ecosystem.

C

TAYLOR / THRALL / ROCKDALE

US 79 connects communities with continuing industrial, warehouse, residential and employment-related activity.

E

SANDOW LAKES / THE SWITCH

Advanced-manufacturing and logistics campus under infrastructure development.

I

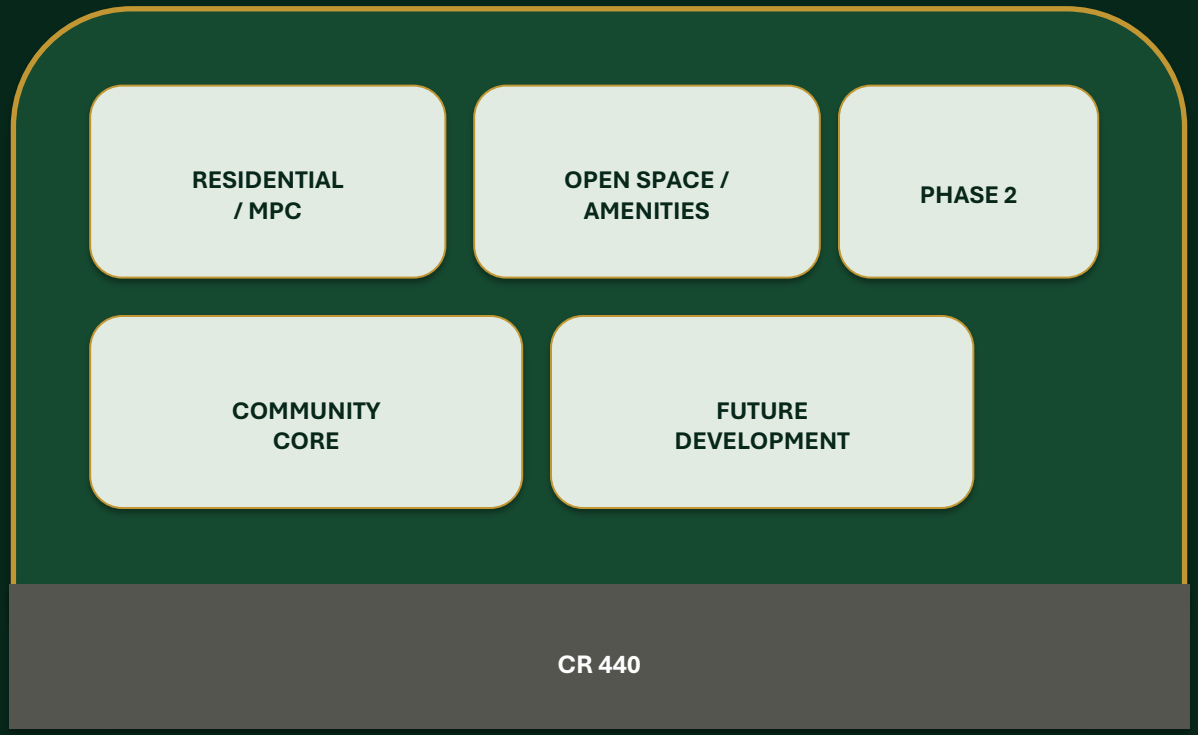

T1 ENERGY

Planned approximately $850 million solar-cell manufacturing facility cited in the marketing materials.

The site's value proposition is tied to corridor-level growth, not a single project.

A large canvas for phased development

Illustrative planning framework only. Not an entitlement, engineering plan or site plan.

POTENTIAL USES

- Land banking / strategic hold
- Residential planning
- Master-planned community concepts
- Phased development
- Other compatible future uses

Final land use, density, access, drainage, utilities and entitlements require independent study and approvals.

Known considerations before closing

LAND-STAR

01	**FLOODPLAIN**	Limited estimated floodplain is concentrated toward the rear of the assemblage. Buyer should verify with current FEMA maps, survey and engineering.
02	**WASTEWATER**	Permit application is filed and draft approval is pending. Confirm current TCEQ status and final conditions.
03	**UTILITIES**	Confirm capacity, connection points, easements, extension requirements and costs directly with providers.
04	**ENTITLEMENTS**	Confirm zoning, subdivision, development standards and governmental approvals applicable to the intended use.
05	**ENVIRONMENTAL / TITLE**	Complete customary Phase I / environmental, title, survey, access, drainage and geotechnical diligence as appropriate.

Why this land position deserves attention

LAND-STAR

01 SCALE

±538 acres create a rare large-tract position in a growth corridor.

02 INFRASTRUCTURE

Road frontage, water access and electric availability support future planning.

03 WASTEWATER PATHWAY

A filed TCEQ application provides a potential infrastructure path, subject to draft and final approvals.

04 LOCATION

Positioned between the Samsung/Taylor employment ecosystem and Sandow Lakes advanced-manufacturing corridor.

THE THESIS **Acquire a large Central Texas land position before the corridor fully matures.**

±538 ACRES

THORNDALE, TEXAS

A strategic land opportunity in the Taylor–Thrall growth corridor.

1401 COUNTY RD 440
THORNDALE, TX 76577
